

Tekes and Finep Joint Call for Proposals for Industrial R&D Projects

Announcement

Based on the Memorandum of Understanding between Tekes, Finnish Funding Agency for Innovation, and Finep, the Brazilian Agency for Innovation, Tekes and Finep launches this Joint Call for Industrial R&D projects.

The main objective of this Joint Call is to support Finnish and Brazilian companies to develop cooperative projects to boost the innovative content of their products aiming at the world market.

Any technological area is covered by this Call. However, the following areas have a special interest from the sponsor countries:

- . comprehensive utilization of waste, energy conservation and energy efficiency (including industrial energy saving, green building, renewable energy etc.);
- . bioeconomy solutions;
- . bioenergy for industry;
- . shipping industry.

Projects content and requirements

The proposals should comply with the following criteria:

1. partners must include at least one Brazilian and one Finnish company and may involve more than one company from each side. Academic and research entities from both sides are eligible to join as sub-contractors only.
2. the joint industrial R&D project should aim to develop products, processes, services, know-how, patent licensing, leading to commercialization in the global market.
3. the project partners must agree in advance on the intellectual property rights and on the commercialization strategy for the outcome of the project (a formalized Consortium Agreement is required).
4. the tasks in the work plan as well as the resources allocated to and demanded for the project should be assigned clearly to each partner.
5. the project must be balanced between the participants and significant to both sponsor countries.
6. both Brazilian and Finnish sides must submit their applications to their respective country's Agency. One side only application is not valid.

The funding for each applicant will be granted according to its respective Agency usual funding requirements, which can be found at www.tekes.fi, for Tekes, and at www.finep.gov.br, for Finep.

Evaluation and selection of the projects

The evaluation and selection of the projects will be carried out in two phases.

In the first phase, the project must be presented to the applicant's respective Agency using the application form attached to this Announcement, which must be presented in two versions: one filled in English and other in the Agency's native language. The English versions of the application form addressed to both Tekes and Finep must present identical content.

In this phase, the proposal will be evaluated jointly by both Agencies, which will examine:

- the innovative content of the proposal;
- the appropriateness of the methodology to be adopted;
- the resources offered by the participants (whether financial or non-financial);
- the requested funding and its application;
- the impact of the results to be obtained for the participating companies and their countries;
- the Consortium Agreement, featuring the IP and product marketing strategy.

Since the cooperative project is recommended at the first phase, the leader partners of each country must present their proposal for funding to the respective Agency. In this second evaluation phase, Tekes and Finep will evaluate separately the projects received according to the criteria each Agency usually uses, including their own operational policies and respective National Laws and Regulations.
